

## COMPANY PROFILE

Catalyst Communications Technologies, Inc.

### ➤ **Overview**

Catalyst Communications Technologies, Inc. is a Voice over IP technology innovator. We are the market leader in providing VoIP dispatch and Interoperability communications products to the mobile radio industry.

### ➤ **Mission**

Catalyst's mission is to make mobile radio voice communications more accessible to people. To bring this about, we leverage our expertise in IP networking, advanced data processing, mobile radio knowledge, and intuitive user interface technologies.

### ➤ **Markets**

Catalyst serves Public Safety, Utility, Federal Government, and Commercial markets. These customers demand reliable, robust solutions for critical communications, have comprehensive network resources, and use technology to create advantage in support of their constituents.

### ➤ **Location**

Our company is physically located in the foothills of the Blue Ridge Mountains outside Lynchburg, Virginia. This part of central Virginia provides the best of both worlds - a pleasant, rural setting and the resources to support a modern high technology organization.

### ➤ **Personnel**

Catalyst personnel build upon decades of experience in land-mobile radio and other wireless communications systems, software development, and computer technologies to create new solutions for the dispatch market. The combination of expertise in Land Mobile Radio, Wireless, Computer Networking, Voice over IP, and Internet Technologies and Markets is unique in the communications industry.

## ➤ **Working Environment**

Catalyst fosters a highly charged working environment that encourages innovation and dedication. Catalyst personnel work closely with our customers, business partners, and local research and educational institutions to create leading edge solutions with superior quality. We are a family-friendly company, offering flextime, an attractive benefits package, and other support mechanisms.

## ➤ **Research and Development**

Catalyst continues to develop new technologies and products through both its internal staff and its association with Virginia universities. Catalyst leverages the latest technology research through its alliance with Virginia Polytechnic (VA Tech) Institute's Center for Wireless Telecommunications, and we have won two SBIR Research Grants for advanced work in moving radio traffic over IP Networks, which we study and report in partnership with Virginia Tech. VPI is a leader in wireless communications, and CWT maintains a center of excellence in research and education in wireless technology.

## ➤ **Current Projects**

Catalyst is supporting its fielded Dispatch products - Network Access Radio™, IP Radio™, IP Tone™, IP Fleet™ - and our IP Network based Interoperability solution, IP Link™. The development team is currently working on new products and features that provide valuable communications capabilities using Voice over IP, graphical user interfaces, and other core technologies.
